

Critical Expectations [CriticalE]

- 1) [CriticalE] Section 8 Safeguard Critical Tasks require competency identification and verification.
[CriticalE] Section 12 Third- and Second-Line Supervisors in LOFT Process Safety Positions, and respective relief personnel shall demonstrate competency in LOFT Process Safety Modules. Delegation of Risk Approval Authority must be in place until competency is demonstrated.

Expectations [E]

- 2) [E] Section 6 Business Units (BUs) must have a documented list of Key Positions (Key Positions identified).
[E] Section 7 Key Position competency requirements must be kept current, reviewed, and approved to reflect any changes to facility conditions and BU organization structure.
[E] Section 8 Key Position must have competencies and experiences required by the role to safely operate the facility, address Operations Integrity (OI) risks and regulatory requirements documented in a training plan (competency requirements specified and documented).
[E] Section 8 Business Units will use the Foundational Craft Skills Standard (FCSS) curriculum or an approved equivalent to provide the expected base line craft competency via instruction and hands on demonstration.
[E] Section 8 Global mandated competencies for Operation & Maintenance (O&M) technicians and supervisors in Key Positions will be assigned within training plans.
[E] Section 8 Local training and regulatory requirements must be reviewed, documented, and assigned within training plans.
[E] Section 8 Business Units will have a systems-based Facility Specific Training (FST) program that underpins the execution of OI tasks and aligns with this UBP including a classroom/knowledge portion and an in-field/skills-based sections specific to the unit.
[E] Section 9 Verification Guides are required for field-based/hands on FST verifications.
[E] Section 9 Personnel in Key Positions will have their Competency Verifications documented and tracked within the Learning Management System (LMS).
[E] Section 10 Business Units will conduct staffing and collective competency reviews.
[E] Section 11 Learning or skills gaps for individuals must be identified, mitigated, and approved by leadership until the gaps are closed.
[E] Section 12 Personnel assigned to a LOFT Process Safety position should complete the LOFT Process Safety assessment within 90 days of assuming the position.
[E] Section 12 LOFT Process Safety assessment completion must be verified by an assessment team approved by the Production Manager.
[E] Section 12 The completion of OIMS Core and Discipline Specific Task Book Modules is recommended for an individual's competency and development. Supervisors may consider an individual's past experiences (e.g., previous leadership roles in Operations) or BU specific focus areas to determine what systems / task need additional development by the individuals, with completion not exceeding 12 months from assignment start date.
[E] Section 12 To ensure a sustainable application of competency demonstration, meaningful Performance Indicators should be utilized to effectively confirm that the different LOFT modules are working as intended. KPI are provided in section below.
